PROFESSIONAL SUMMARY

AI and Backend Engineer focused on building scalable, production-ready backend systems and AI-powered applications. Experienced in designing and implementing distributed backend architectures, multi-tenant databases, and asynchronous processing systems using Python, FastAPI, and PostgreSQL. Proven track record of delivering real-world solutions that integrate Natural Language Processing (NLP) and multimodal AI, with a strong focus on system scalability, reliability, and security.

TECHNICAL SKILLS & RESEARCH INTERESTS

AI & ML: Natural Language Processing (NLP), Named Entity Recognition (NER), Multimodal AI (Text, Image, PDF, Audio), Scikit-learn, Data Preprocessing & Evaluation

Programming & Frontend: Python, Java, C, SQL, JavaScript, HTML, CSS

Backend & Databases: FastAPI, Django, Flask, Node.js, RESTful APIs, Asynchronous Processing, Queue-based Systems, Multi-tenant Architectures, PostgreSQL, MySQL, MongoDB, SQLAlchemy ORM, Database Schema Design

DevOps & Testing: AWS (S3, Lambda, SES), Docker, Render, CI/CD, Git, GitHub Actions, Unit/Integration Testing (Pytest)

Core & Strengths: Data Structures, Algorithms, Systems Architecture, Systems Design, API Development, Problem Solving, Analytical Thinking, Team Collaboration, Continuous Learning

WORK EXPERIENCE

Software Developer — ShrFlow (Confidential Project) Jan 2026 - Present

Collaborated with external team | Remote

- Contributed to building a scalable production-grade digital platform under NDA constraints
- Designed and developed backend APIs with emphasis on performance and maintainability
- Optimized data processing workflows to improve system efficiency and responsiveness
- Collaborated with team members to design modular and scalable system components
- Performed debugging, testing, and improvements to enhance system stability and reliability

Freelance Full Stack Developer — Tailoring Business Platform Apr 2026 - May 2026

Mobile-first Web App | Remote | [LIVE](#)

- Launched a mobile-first web platform for a local tailoring business, driving a 30% increase in order volume
- Designed a responsive user interface optimised for non-technical users, improving mobile usability scores by 25%
- Created an admin dashboard enabling real-time management of custom apparel designs, pricing matrices, and customer reviews
- Integrated a dynamic image gallery with cloud-based media handling, reducing page load times by 50%

AI/ML Project Developer (Industry-Guided Student Program) — ByteXL Aug 2025 - Oct 2025

Chatnalyxer - AI-Powered Communication Assistant | Remote | [GitHub](#)

- Constructed a production-ready FastAPI backend that handles real-time WhatsApp message processing and push notifications
- Implemented NLP-based task and deadline extraction using Azure AI Services, achieving 96% accuracy across test datasets
- Modelled a structured PostgreSQL schema using SQLAlchemy ORM to process and store multimodal inputs efficiently
- Deployed backend services on Render via automated GitHub Actions CI/CD pipelines, achieving 99.9% uptime

EDUCATION

Bachelor of Technology in Computer Science and Engineering (AI & ML) — Pre-final Year June 2023 - Present

Parul University, Gujarat, India | CGPA: 7.93/10.0

Class XII (Telangana State Board) 2023

Score: 82.6%

Class X (Telangana State Board) 2021

Score: 97%

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900) — Microsoft 2025

Credential Badge: [Credly Badge](#)

Introduction to SQL — DataFlair 2025

Credential Certificate: [Drive Link](#)

AI/ML Sprint — ByteXL 2025

Credential Certificate: [Drive Link](#)
